

# GRAND JUNCTION WATER WORKS.—

The Directors of the Grand Junction Water Works have the satisfaction of informing the Proprietors, that every difference between them and the Stone Pipe Company is amicably adjusted, and that all the shares in which the compensation for damages was received have been sold by the Directors at prices increasing from 37l. 10s. to 40l. per share, producing 34,368l. a saving to the Water Company equal to pay a dividend of twenty per cent. on their capital, and which with a small addition will enable the Directors, when the season admits, to complete the works, in Hans Town and South of Piccadilly and Grosvenor-place, to the Thames, through the whole of which large district they can give the high service of water all and every day, in any quantity, without using the engine, consequently at less expence to the Company, and upon more moderate terms than have hitherto been enjoyed by the inhabitants. The Grand Junction Water Works Company will learn with pleasure that their works are completed to serve 10,000 houses, and that although in December 1812 they they had only one hundred water tenants, their rental now exceeds the expenditure for their permanent establishment. - The Grand Junction Water Works' Office is removed to No. 13, Shepherd-street, Hanover-square; where it is requested that all demands may in future be made, also applications from their tenants, in cases of fire.—Wanted six experienced Turncocks; wages 26s. per week.

**WANTED.** on MORTGAGE of a Freehold
